

CAPABILITY STATEMENT

WolfPeak

WolfPeak is an environmental consultancy company that we built so we can live by our values and contribute to the issues that matter most to us. We aim to do things a bit differently, so our clients enjoy working with us, and can rely on us to deliver the outcomes they need without the fuss.

WOLFPEAK CAPABILITY STATEMENT

Our diverse knowledge and experience enables the economy to thrive whilst protecting the environment.

Some of the services we provide include:

- Sustainability
- Infrastructure and Environmental Management
- Environmental Planning and Assessments
- Biodiversity and Natural Resource Management
- Government and Strategic Advisory
- Risk, Audit and Compliance

WOLFPEAK CAPABILITY STATEMENT

At WolfPeak, our working relationships are based on respect, honesty, responsiveness, and flexibility. We pride ourselves on communicating clearly, so our ideas, advice, and findings lead to tangible business results.

We are a team of like-minded, motivated and skilled professionals with broad experience and expertise. : We offer specialist consulting and project services across the environmental, government, natural resource, planning, sustainability, auditing, evaluation and disaster recovery disciplines.

We can work closely with you to help solve complex strategic or systematic issues. Or we can complete specific tasks for you – such as producing the reports, assessments and plans you need for project assessment, approval and implementation. We also have extensive contacts across government and industry that we can draw on to get the best outcomes for our clients.

We place a high value on trust both within our company and with our clients. Our working relationships are based on respect, honesty, responsiveness and flexibility. And we pride ourselves on communicating clearly – so our ideas, advice and findings lead to tangible business results.

Sustainability

WolfPeak offers a wide range of expert sustainability management and auditing services. Our highly skilled, award-winning team includes Exemplar Global certified Lead Auditors, IS Council Infrastructure Sustainability Accredited Professionals (ISAP), Green Star Accredited Professionals (GSAP), and certified greenhouse gas (GHG) management specialists, who can provide valuable input to your project or organisation.

Some of the sustainability services we provide include:

- Working collaboratively with multidisciplinary teams to establish and implement sustainability management systems to drive sustainable outcomes on projects and within organisations.
- Working with organisations to measure and track their organisational carbon footprint in line with the GHG Protocol Corporate Standard.
- Identifying opportunities for emissions reduction and innovation for organisations and projects, and developing strategies to lead the implementation of opportunities.
- Working with organisations of all sizes to develop and implement an ESG strategy to deliver meaningful change that has a positive impact.
- Developing Infrastructure Sustainability (IS) Rating strategies and supporting delivery of a project's IS Rating submission, including performing the Independent Sustainability Professional (ISP) role. We can assist with ratings being delivered using all versions of the IS Rating Tool.
- Conducting independent sustainability auditing in line with AS/NZS ISO 19011 and IS Rating requirements, to identify areas for improvement and maximise sustainability outcomes on projects.

Key projects

- Amazon - Sustainability Building Audit and Carbon Offset Guidance
- Sydney Metro, Western Sydney Airport SCAW Package – Design IS Rating
- RM Watson – ESG Strategy services
- Fulton Hogan – Project Sustainability Review
- Jemena and Sydney Water – Malabar Biomethane Facility As-Built IS Rating
- Sydney Gateway Stage 1 & 3 – Independent Sustainability Auditor
- Sydney Metro, Western Sydney Airport SSTOM Package – Design IS Rating

WOLFPEAK CAPABILITY STATEMENT

Environmental Planning and Assessments

At WolfPeak we pride ourselves on our strong environmental assessment and approvals background. We have significant experience in scoping and managing Environmental Impact Statements, and preparation of assessments for a range of developments and infrastructure projects. Our knowledge of the planning system and how things get built means when we can successfully foster projects from concept to delivery.

Our team are available for secondment, embedding themselves with project teams, to deliver and manage planning approvals. We have provided this service for The Department of Planning Industry and Environment, local Councils, TransGrid, Transport for NSW and the Australian Rail Track Corporation.

Key projects

- TransGrid – Transmission line remediations, upgrades and extensions (multiple across NSW)
- Transurban / Transport for NSW – M5 East Water Treatment Plant Replacement and Georges River Bridge Bearing
- Optus – Optical Fibre Installation Dharawal National Park
- National Parks and Wildlife Services (NPWS) – Sea to Summit Walking Trail Yarriabini National Park, Bongil Fire Access Fire Trail Upgrades
- Soil Conservation Service / Crown Lands– Warialda Fire Trail Fire Access Upgrades and Town Asset Protection Zone Development
- Port Macquarie Hastings Council– Port Macquarie Foreshore Redevelopment –
- MidCoast Council – 10 Landslide Remediation Projects
- Kempsey Council – Upper Macleay Bridge Replacements

WOLFPEAK CAPABILITY STATEMENT

Biodiversity and Natural Resource Management

WolfPeak's biodiversity and natural resource management offerings are solutions based and essential. We consult on a range of issues to help both councils and private land owners protect and improve on the health of their environmental assets, and to prevent or manage impacts from works. The protection of our natural resources is essential in ensuring land and biodiversity health as well as long term productivity and growth.

Key services

Ecology Services

- Biodiversity Development Assessment Reports (BDARs)
- Assessment Development of Local Environmental Studies for local government rezoning initiatives
- Species specific studies and reporting such as koala habitat
- Threatened species assessments
- Strategic invasive weed assessment and control works
- Habitat restoration planning and on ground works

Biodiversity Stewardship

The Biodiversity Offsets Scheme creates a transparent, consistent and scientifically based approach to assessment and offsetting for development that is likely to have a significant impact on biodiversity. WolfPeak can assist in the following areas:

- Strategic advice and assessment reports on Biodiversity Offsetting on land asset portfolios
- Connect credit purchasers with credit providers in regional NSW
- Assist with the project management, reporting and on-ground management of your stewardship site

Vegetation, Riparian, Coast and Estuary Management

- Preparation of vegetation and coastal management studies and plans
- Delivery of on-ground works under the new NSW coastal management reforms
- Waterway health and planning assessments
- Acid sulfate soil management and soil erosion mitigation works.

Government and Strategic Advisory

WolfPeak offers expert strategic planning and stakeholder engagement within the public sector. Our organisation is built around a select team whose experience in project management and stakeholder engagement is exemplary. Our diversely experienced team can provide valuable input to your project to help you find solutions to strategically challenging and sensitive issues, create structure, resolve issues, and deliver meaningful outcomes for the public in a timely manner.

We support our clients to make strategically sound decisions based on knowledge, data and consultation. We do this through:

- **Strategy** – our team brings experience in policy, politics, media, communications, stakeholder engagement and problem solving.
- **Relationships** – our reputations and relationships are our most valuable asset. Built up over many years of working in the sector we use these to get to the heart of an issue, work with stakeholders to find amenable solutions and then deliver the best outcomes for our clients and the community.
- **Project management** – our team brings tried and tested project management techniques, applies them in a way that specifically meets the needs of our clients. We are able to track and report on progress, identify future needs and provide advice to approach identified gaps. We communicate and engage with inter- and intra- government stakeholders, appropriate to their interest in the project, and work with the stakeholders to address needs and obtain required approvals.

Key projects

- Natural Disaster Strategic Coordination - Department of Regional NSW
- Resilient Homes Fund Program Coordination - NSW Reconstruction Authority (formerly the Northern Rivers Reconstruction Corporation)
- Bundian Way Walking Trail Node 1 Project Management- Eden Local Aboriginal Land Council
- Organisation Strategic Planning - Local Land Services (LLS)
- Tourism Product Audit and Mapping Project

WOLFPEAK CAPABILITY STATEMENT

Infrastructure and Environmental Management

WolfPeak are experts in the delivery of major infrastructure, having provided environmental support and leadership to some of the most important projects throughout NSW. We understand the complex challenges posed at each stage of project delivery, whether they be environmental, regulatory or organisational. WolfPeak provide effective solutions to these challenges and help clients realise opportunities to achieve outstanding results.

Our expertise includes:

- EIS management and technical review
- Tender support (budget development, technical advice, environmental returnable schedules and client interactives)
- EMS and CEMP development and implementation
- Construction phase expertise (environmental leadership, site support, compliance and monitoring)
- Independent Environmental Representative support.

Our team have held various environmental leadership and support roles for clients including Transport for NSW, major civil and construction contractors, and the Department of Planning Industry and Environment. We understand how each stakeholder fits into the infrastructure ecosystem, what their drivers are, and how to optimise engagement so that projects are delivered seamlessly.

Key projects

Energy

- Snowy 2.0 – Future Generation Joint Venture
- Wellington Solar – Sterling and Wilson / Light SourceBP

Roads

- WestConnex New M5 Motorway(MB) – Transport for NSW
- M6 Motorway Stage 1 – Transport for NSW

- Transport Access Programs – Transport for NSW
- St Mary's Intermodal – Pacific National.

Risk, Audit and Compliance

WolfPeak has built its risk, auditing and compliance (RAC) capabilities over the last 10 years to become one of the most respected organisations in this field. We apply a robust and problem-solving approach to all our work, including to RAC. This is drawn from our extensive experience working on, and providing independent support to, complex large-scale projects.

Our team have held environmental leadership roles with delivery teams and regulatory roles within State Government including the Department of Planning Industry and Environment (DPIE), the NSW Environment Protection Authority, the Natural Resources Commission, the former Department of Land & Water Conservation and the Independent Pricing and Regulatory Tribunal. Our team has been approved by DPIE, the Resources Regulator and the Department of Water and the Environment as the Independent Auditors, Risk Assessors or Environmental Representatives for scores of State significant projects.

All major projects have a range of challenging environmental, community and / or regulatory issues and settings. We are able to navigate these challenges and provide advice that gives our clients the confidence and clarity they need to succeed.

WolfPeak also offers safety auditing and development of management service systems. WolfPeak provides the right support so businesses would navigate and accomplish their safety, environmental and quality obligations and targets, meeting the requirements of the relevant Australian Standards and Legislation.
